

## TECHNICAL DATA SHEET

## SECUNORM SMARTCUT MDP NO. 110700

## Safety technology

# Automatic blade retraction – a high degree of safety

The automatic blade retraction of the SECUNORM SMARTCUT MDP guarantees a very high degree of safety from cut injuries. As soon as you have started to cut, take your thumb off the slider. The blade can thus withdraw back into the handle immediately after leaving the material being cut.

#### SMALL DISPOSABLE SAFETY KNIFE WITH AUTOMATIC BLADE RETRACTION.

**Order No.** 110700.02

## Yes, a cutting tool can be this SMART. Metal detectable.

Make one cut with this knife and you'll know immediately why it's called a SMART cut. Its light and compact shape is SMART. The fact that it is suitable for almost all types of cutting material is SMART. What's also smart, is that you can use it in sensitive industries without thinking twice. Because its plastic handle is metal detectable and it has a stainless steel blade. Good to know, isn't it?

#### Can be metal detected

A cutting tool, or parts of it, can get lost while working. But only for a short while. Because the plastic that can be detected by a metal detector ensures you can find it again quickly.

#### One way, two advantages

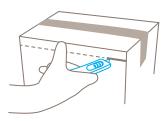

The SECUNORM SMARTCUT MDP is a disposable cutter. What that means for you: no risk of injury when changing the blade. The blade also cannot get lost in the production process.

#### Slider on both sides

With the right hand? With the left hand? The question does not arise. Because we have put a slider on to the SECUNORM SMARTCUT MDP that is accessible from both sides. Choose for yourself!

#### Perfect handling

The product does not only look handy. Its small, rounded handle actually fits very well in your hand. What's more: the slider is fitted with grooves so that your thumb doesn't slip.

## PRODUCT FEATURES

#### Technical features

High safety

Metal detectable

Disposable knife

Abrasion resistant

Very ergonomic

Extended blade length

Cutting depth

For right and left hander

Lanyard hole

stainless

#### Main cutting materials

Cardboard: up to 2-ply

Wrapping, stretch, and shrink foil

Tape

Layers of foil or paper

Yarn, cord

#### Installed blade

## Blade thickness 0.63 mm

## BLADE CHANGE

Please note: the stainless steel blade is moulded into the body of the cutter and cannot be changed.

## SECURITY ADVICE

To ensure that you use your new MARTOR knife safely and most effectively, please read and note the following user-instructions. Please keep the written guide in a safe place so that you can access it at any time.

- **1. Usage advice:** Please use the product carefully for described work only and not for any purposes other than those that are intended. Please take the correct handling and the proper use of the cutting tool into account in this regard.
- 2. Special application Instructions to avoid the danger of injuries: Only use cutting tools that are in perfect condition and have sharp, clean and undamaged blades. Employ the utmost care when handling the knives. CAUTION: The blade is sharp and can result in serious and deep cuts. Therefore, never reach into the blade! To reduce the danger of injuries, hold the hand that is being used to restrain and stabilise the

cutting base in such a manner that the restraining hand or even other body parts are not endangered in the event that the knife slips. Do not modify this product in any way. Modifications of any kind may impair product safety. CAUTION: The risk of injury caused by manipulation of this product is extremely high. When both cutting edges are no longer sharp, dispose of the knife as general waste.

- **3. Non-use of the knife:** Store the knife in a secure place.
- **4. Care instructions:** Always keep the knife clean and do not expose it to unnecessary humidity to safeguard a long service life.

CAUTION: No liability will be assumed for consequential losses. Subject to technical changes and errors! This knife does not belong in the hands of children!

## BELT HOLSTER M WITH CLIP NO. 9921

## ACRYLIC TEST CARD SET NO. 9900

You can check the sensitivity of your metal detector to MARTOR'S MDP plastic by using our acrylic test cards. The MDP TEST CARD SET ACRYL consists of five cards. Each card houses a small MDP plastic ball, ranging in size from 2.5 to 8 mm in diameter. The acrylic cards are especially stable and durable.

What do you do with your cutting tools when you are not ac-

tually using them? The MARTOR BELT HOLSTER M is a robust

holder that allows you to carry all midsize MARTOR cutters as well as our safety scissors at all times. In addition, the interior and exterior pockets are designed to allow you to load different tools: for example you can carry an extra cutter, a pen and a pack of blades. The MARTOR BELT HOLSTER is the ideal place to stow your tools safely when moving from A to B - and have them at hand, as soon as they are required.

## BUSINESS CARD TEST CARD SET NO. 9910

There are five cards with different plastic balls in the MDP TEST CARD SET - between 2.5 mm and 8 mm in size. You can reliably test the effectiveness of your metal detectors using the "Visiting card". The difference between this and the acrylic card is that it is welded into a polythene bag and cannot be re-used so frequently.
