- TydenBrooks 8 Chamber to be sealed with the TydenClip

COLORS

- Stock Clip Color: White
- Available Colors: White, Yellow, Green, Blue, and Red

MARKING

- Laser
- Barcoding available

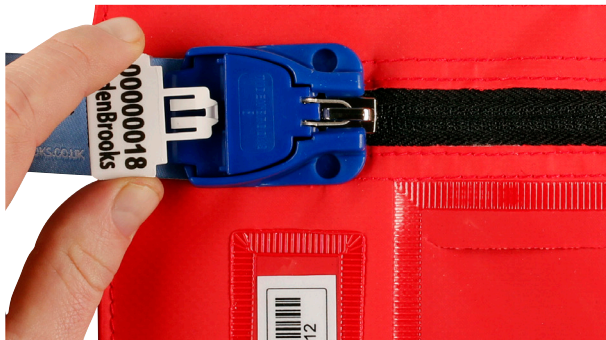

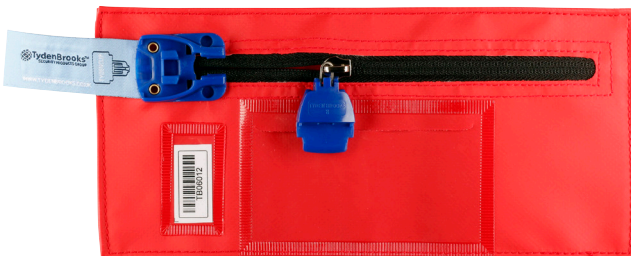

TydenClip Security Bag Administrative Specifications

Advice on how to correctly seal a TydenClip Security Bag:

Step One: Pull the zipper closed using the chamber lid. Place the chamber lid in the chamber housing.

Step Two: Slide the TydenClip security seal into the chamber as shown below and record the number.

TydenClip security seals include a serial number. These serial numbers serve as a unique identifier. We recommend having a procedure in place to record the numbers prior to use and removal. TydenClip seals should be stored in a safe location prior to use. TydenClip seals should only be issued to authorised individuals and documented.

Advice on how to correctly remove a TydenClip Security Seal from a Security Bag:

Step One: Check the seal number matches the recorded number. If the number does not match your records, please advise the appropriate authority.

Step Two: Lift the tab of the seal up, the seal will break and the chamber lid is then used to unzip the bag. Dispose of the broken seal by removing the seal tab and legs.
